## AIM OF THE GAME

To play cards on your body or another player's body. Be the last player to drop your cards.

## GET READY!

- Get the free **Shufflecards** app for the quickstart video or continue reading.
- All sit in a circle cross legged. Sit so you can touch the players next to you.
- Take one card of each colour Red, Yellow, Blue & Green and put them on the floor equally spaced between the players.
- Put the rest in a single pile, Dot side up.

CONTENTS:  
55 TWISTER CARDS

## HOW TO PLAY

1. The youngest player takes the top card from the stack and turns it over.

2. The card will tell you what to do. You either have to put a card on yourself and touch a colour OR put the card on another player. Always place the card so the dot side faces outwards for all to see.

3. If you are asked to touch, then look to see if you touch with your hand or your foot.

Then look to see which colour the spinner is pointing to, sometimes you get a choice. You can either touch a matching card colour on the floor or touch another player already 'wearing' a card of that colour.

4. If you are asked to place a card on another player then look to see which colour the spinner is pointing to and place the card on a player 'wearing' a card of that colour.

If more than one player or no player is wearing that colour you get to choose.

5. If you drop a card or knock a card off another player then you lose a life. Each player gets two lives. If you lose both your lives you are out of the game. Keep playing until one player is left.

### OPTIONS

You can choose to play with more cards on the floor or none at all. You can also choose to play with fewer or more lives.

### THE WINNER!

If you lose both of your two lives you are out the game. The last player left wins.
