

## Game Rules

### Rummy

Shuffle all the cards well. Each player gets 7 cards. The remaining cards are placed face down in a pile.

During a player's turn, he or she may put down a series of three cards, or add suitable cards to one of the series already on the table.

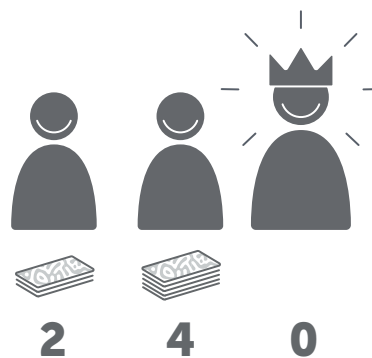

You may play the following:

Series of at least three consecutive numbers of the same colour.

Series of at least three cards with the same number.

If you cannot play a card, then you must draw a card from the draw pile. Play then moves to the next player.

The first player to get rid of all his or her cards wins the game.
